Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim format

Note that each element or step of the claims has not been separated by a line indentation.
See 37 CFR 1.75 and MPEP § 608.01(i)-(p).

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 – the embodiment of figures 2-6 (including element 46)

Species 2 – the embodiment of figures 7, 8, 10 and 11 (including element 52)

Species 3 – the embodiment of figure 9 (including element 52a)

Species 4 – the embodiment of figures 12-14 (including element 48)

Species 5 – the embodiment of figures 15-19 (including element 76)

Species 6 – the embodiment of figures 20-26 (including element 76a)

Species 7 – the embodiment of figures 27-33 (including element 76n)

(It is unclear if figure 1 is intended to be generic to both species 1 and 2 since the figure 1 depiction of elements 50 and 34 does not appear to be the same as shown for species 1 and 2. For purposes of restriction the examiner assumes figure 1 to be generic but incomplete).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). None of the claims are generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for at least the following reasons:

Species 2-7 lack the special technical feature of element 46 in species 1

Species 1 and 3-7 lack the special technical feature of element 52 in species 2

Species 1, 2 and 4-7 lack the special technical feature of element 52a in species 3

Species 1-3 and 5-7 lack the special technical feature of element 48 in species 4

Species 1-4, 6 and 7 lack the special technical feature of element 76 in species 5

Species 1-6 lack the special technical feature of element 76a in species 6

Species 1-6 lack the special technical feature of element 76n in species 7

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
